CORRESPONDENCE

TO Mr. C. B. Hunt ADDRESS Houston

FROM R. W. Maeser ADDRESS Houston

SUBJECT OSHA Sample Results DATE July 17, 1984

Mr. Charles Williams, OSHA inspector, phoned at about 9:00 a.m. on July 17, 1984, with OSHA's results on the sampling in the cafeteria on June 7. OSHA did not indicate detectible levels of asbestos on any of the air monitoring samples. All wipe samples showed nil on asbestos except one which indicated a trace. OSHA does not consider a trace as sufficient evidence for concern. Mr. Williams indicated this closed the complaint as far as he was concerned.

Mr. Williams requested that Ronnie Guinn and Jim Wolcott contact him so he could personally give them the results of OSHA's sampling. Lenard Vaughn was advised to get this information to Mr. Guinn and Mr. Wolcott.
