Paint your house with

SWP

THE above picture shows
that one gallon of SWP
house paint covers 360
square feet of surface, two
coats. Ordinary paint covers from
100 to 250 square feet. That is the
first saving. SWP, though heavy-
bodied, flows easily and evenly,
thus cutting down the time re-
quired to apply it. That is the
second saving. SWP contains two

or three paintings with or-
dinary paint, saving the cost
of materials for repainting
and also saving the labor
cost which is about 75 per cent of
the total expense.

In buying paint it's the area a gallon
covers, not the cost per gallon, that de-
termines economy. We carry a com-
plete line of SWP. If you plan to paint
your house, let us help you.

We feature the entire line of
SHERWIN-WILLIAMS Products—
and will tell you how to prepare the surface and
DO THE JOB YOURSELF!
