FILE NAME: Mead (MEAD)

DATE: 1971 July 13

DOC#: MEAD057

DOCUMENT DESCRIPTION: Memo

Cement Asbestos Products Company

Ragland, Alabama

FROM: James E. Carpenter July 13, 1971

TO: H. Clay Davis

SUBJECT: Air and Water Pollution Report - Capco - Ragland

1. Our primary pollution problem is dust from machining and reclaim operations.

2. Installation of our new dust collector has been completed and has greatly reduced the free dust in our finishing area. Our immediate plans call for relocation of other machining equipment that are problem areas to a central location and applying the equipment displaced by the above dust collector.

3. Guidelines 4-7 do not apply.

4. Our dust collection systems are in good condition and working effectively.
