

bcc: E. L. Shipley

November 2, 1972

Mr. J. Lehman, Purchasing Agent
Armco Steel
Middletown, Ohio 45042

Dear Mr. Lehman:

We have been in contact with Mr. Tom Shipley of your company (Mr. Neary wrote in February and March) concerning the conversion of your Therminol FR system. Mr. Shipley indicated in his March telephone conversation Armco Steel would have 8 drums of FR materials to return. Since we have not heard anything further, it may be your plant is still using Therminol FR fluids. If such is the case, we want to review with you the desirability of discontinuing their use.

In May, 1972 the Federal Government's Task Force on PCBs recommended against the use of PCBs as heat transfer fluids. Enclosed is a summary of their proposals. Also enclosed is a copy of a Wall Street Journal article highlighting restrictive action proposed by the FDA.

In April, 1972 our Mr. Papageorge sent a letter addressed to the "Plant Manager" of your plant. You may want to review this letter (copy enclosed) for additional background on this PCB subject.

We want you to be aware that some Federal and State agencies are sampling plant effluents and marine life looking for, among other things, PCB chemistry. If PCB is found, the agencies tend to determine the PCB source.

In light of the above, we believe you should seriously consider converting your Therminol FR system. In the event you have converted to a non-PCB fluid, we would appreciate knowing the disposition of the used FR containing fluids.

If there are any questions on the above, please feel free to contact me at (314) 694-2514.

Sincerely,

Paul W. Gann
Project Coordinator
Heat Transfer Fluids
