Re: The Fate of Inhaled Particulate Lead Compounds

Dear Dr. Kehoe:

We have received notice of your research project from Science Information Exchange. With your permission, we would like to include it in our 1967 Index to Air Pollution Research.

The Index is a guide to what research is being conducted, by whom, and where; it will provide the means for a greater and more rapid exchange of knowledge and ideas between personnel working in similar areas of air pollution research.

This will be the third year of publication for this guide. Requests for the Index are continually increasing; it has been well received and has circulated beyond the limits of the United States. In striving for a better publication, this year we plan to include titles of papers resulting from research still in progress. If you have such publications, will you please send us a copy.

In the Index, we intend to include: (a) the author(s) name, (b) the project title, (c) the performing organization and address, (d) a code indicating the supporting organization, and (e) titles of papers resulting from this research.

If we do not hear from you by April 24, we will assume it is acceptable to use your project in our guide to research.

We appreciate your cooperation in our request. If you have any questions, please let us know.

Sincerely yours,

Nancy Miller/Blm
(Mrs.) Nancy I. Miller
Head of Information Service
