SUBJECT: RESPIRATORY PROTECTION PROGRAMMING

It has been over one year since the CCC Respiratory Protection Seminar was held in Dallas (1/30/80) and your attendee(s) had an opportunity to implement the recommended respiratory protection program for your facility.

I would appreciate a brief status report from your location regarding each of the subject elements covered in the 1/30/80 seminar. An outline of the seminar subjects and the attendee list is enclosed.

There has also been some recent question regarding company position pertaining to facial hair policies.

While the subject of facial hair was covered during the seminar, I am enclosing a copy of SPK/96/80, which summarizes company position in this regard.

1. Dave Barrett is preparing a summary of the semi-quantitative fit test utilized by Dupont which may be of interest for any location that has not yet completed development of a fit test program.

In addition, if you need any assistance regarding training programs we have several here in Dallas which Bill Adams can make available.

I would appreciate your summaries by November, 1981.

SUBJECT: RESPIRATORY PROTECTION SEMINAR, JANUARY 30, 1980

Attached is a summary of the above CCC Seminar which was held in Dallas. Thank you for arranging representation from your location.

As you can see from the brief program outline and the subject summary, the matter of respiratory protection was covered in detail. The purpose of the seminar was to provide sufficient information and direction to enable each location to compliment existing activities to assure maximum respiratory protection for our employees and achieve compliance levels with the OSHA standards.

I have asked each attendee to meet with you and his/her respective supervisor to review the scope of this subject, how it compares with your existing Respiratory Protection program, and then assist, if required, in establishing necessary action programs relating to inspections, fit testing, levels of protection evaluations, maintenance, etc.

A special thanks to Dave Bremer for arranging to let Les Wallace participate in a major part of this seminar.

The matter of physical disqualification on the usage of respirators received much attention and discussion. It was agreed that Bob Swanbeck would be disseminating some guidelines on this subject after reviewing with medical, legal and other related departments.

Enclosed is a list of seminar attendees.

2. ANSI Z88.2 - Practices of Respiratory Protection
3. Title 30 Part 11 - Bureau of Mines Approval Regulations
4. Compressed Gas Association Pamphlets
 - (a) C-4 (Z48.1) Method of marking portable compressed gas containers to identify the material contained
 - (b) G-7 Compressed air for human respiration
 - (c) G7.1 (Z86.1) Commodity specification for air
5. NIOSH/OSHA Respirator Selection Decision Logic
6. Title 49 - Testing high pressure vessels
7. Training Aids - Video Tapes
 - (a) "Inspection of air purifying devices
 - (b) "Respirator fit testing
8. Inspection check list for SCBA.

II. ELEMENTS OF MINIMAL ACCEPTABLE PROGRAM

10:15 - 11:00

- A. Title 29, Part 1910.134 Subpart B
- B. ANSI Z88.2

----- BREAK -----

III. SELECTION OF RESPIRATORS

11:15 - 12 Noon

A. How to Select

1. Respirator decision logic by NIOSH/OSHA
2. Scott selection guide chart
3. MSA selection guide chart

008655

- B. Industrial Hygiene Considerations (Grover Vos)
- C. Maintenance and Inspection
- D. Video tape "Inspection of Air Purifying Devices"

IV. MEDICAL CONSIDERATIONS (Robert Swanbeck)

12:00 - 12:15

----- LUNCH -----

V. SELF-CONTAINED BREATHING APPARATUS

1:00 - 2:30

A. Selection

- 1. Respirator decision logic by NIOSH/OSHA
- 2. Scott Selection guide chart
- 3. MSA Selection guide chart

B. Vendor - Vallen Representative

- 1. How to obtain Field Repair License
- 2. Demonstration of Inspection and Use

C. Supplied Air - Be careful

- 1. Hose Connector
- 2. N₂TIE-INS to Air Headers
- 3. Spot-check breathing air bottles
 - (a) Oxygen content
 - (b) Carbon Monoxide content
 - (c) Water content
 - (d) Oil content

D. Training and Education

- 1. ANSI Z88.2 Section 7.4
- 2. Mini-Meeting - 45 minutes
- 3. Smokehouse - Group Training
- 4. Fit Testing

008656

(a) Irritant Smoke

(b) ISO-AMYL Acetate

5. Video tape "Respirator Fit Testing"

----- BREAK ----- 2:30 - 2:45

VI. INSPECTION (SCBA)

2:45 - 3:45

1. Prior to, and after usage
2. Weekly
3. Detailed Monthly
4. Record Keeping

VII. MAINTENANCE

3:45 - 3:55

1. Field Repair
2. Shop Repair
3. Yearly Maint/Contract

VIII. SUMMARY

3:55 - 4:00
