ANOTHER PAIR OF WORLD'S RECORDS

During the recent championship matches of the United States Revolver Association, a team of the Springfield Rifle and Revolver Club established a new five-man score of 1214 x 1250. In doing this spectacular shooting, the team broke their own former world's record by eleven points.

During the same championship matches another world's record was set when Mr. C. A. Price of the Springfield Club scored 249 x 250. In registering this score Mr. Price broke the

previous record, 248 x 250, made last year by his team-mate, Dr. I. R. Calkins.

Both the old and the new individual and team records were made with US .22 N. R. A. long-rifle cartridges and Smith & Wesson 10-inch perfected model pistols.

Test US .22 N. R. A. long-rifle cartridges in your own pistol or rifle. It won't take you long to realize that "possibles" are "probables" with these straight shooting .22's.
