to you ever brought to your attention at any time when you were at Owens-Corning, either when you were an assistant to the president or when you were president of the company?

A I don't remember it. I knew Bowes pretty well, and I don't know how asbestos got by him actually.

Q Another paragraph as to this letter in 1948 says, "I realize that our findings regarding Kaylo are less favorable than anticipated.

"However, since Kaylo is capable of producing asbestosis, it is better to discover it now in animals rather than later in industrial workers.

"Thus the company being forewarned will be in a better position to institute adequate control measures for safeguarding exposed employees and protecting its own interests."

If you had known that information, Mr. Thomas, would that have affected in any way whether or not Owens-Corning would have sold the Kaylo product?

A I don't know. I think we would want more
