Robert A. Kehoe, M.D.
The Kettering Laboratory
University of Cincinnati
College of Medicine
Cincinnati, Ohio

Dear Bob:

Thank you for your letter of September 17, 1958
outlining the important work which your laboratory is performing
on the long term toxic potentials of Ethyl Corporation's AK-33X.

In our Research and Development Laboratory we will be
handling this from time to time using the precautions suggested
in the current procedure from the product service and safety
section of the Ethyl Corporation.

In order that our refinery physician, Dr. Charles Rigby,
may be conversant with the potentialities of any unexpected
acute exposures to this substance, would you be so kind as to
write him a letter at the address below indicating the effects
on humans of an acute exposure and if possible, any therapeutic
steps which should be taken.

Charles E. Rigby, M.D.
Medical Department
Sun Oil Company
Marcus Hook, Pennsylvania

Thank you for your help in this matter.

Cordially yours,

Lamson
