John,

Please consider your effort "to prepare a proposal to provide additional support to the exposure assessment work of the Shanghai Health Study" part of the scope of work of this contract.

In fact, I expect that any work plan that you develop will be covered under this same consulting contact. API just needs to make sure that the proposed activities are endorsed by the investigators and that sufficient funds are available.

It is very important to the Sponsors of the study that you and Dr. Herrick are engage in this critical aspect of the project. Thank you for all your efforts.

Please contact Bruce Jarnot or myself if you have questions.

John,

Per your request, have changed the financial contact for the contract and have changed the hourly rate to \$235 US, which is all that the budget can accommodate. Since both of the changes are on page 1 of the contract, please substitute the attached page 1 for what you currently have, and then sign the contract, returning one copy to me.

Have spoken with Bruce regarding the additional support described in your e-mail. At this time, there is not adequate information to support adding such a scope and related budget to the current contract. We will address at the appropriate time.

Many thanks.

Regards,

Linda

Subject: Contract number 2006-102362

Dear Ms Kangas

I have received the above contract for signature. Please be advised that my current hourly rate for this type of work is 125GBP, which corresponds to about \$238 (the \$185 rate has been unchanged since the last contract, dated 2004). I'd be grateful if the contract could be amended to reflect the higher charge rate.

Also, at the recent SRP meeting in Huston I was asked to prepare a proposal to provide additional support to the exposure assessment work of the Shanghai Health Study. If API wish me to undertake this then it may be more efficient to include the added costs in the present contract.

Finally, the financial contact at IOM is now Mr Chris Owens rather than Mr John Allen.

Thank you.

John Cherrie
