

Georgia Gulf Chemicals & Vinyls, LLC
Aberdeen Plant
Emergency Response Plan

Subject: **Condensed Emergency Instructions**

Code: ERP III Revision: 2 Effective: January 1, 2000

Approved By:  Safety & Health Manager

Approved By:  Plant Manager

III. CONDENSED EMERGENCY INSTRUCTIONS

1. The Shift Supervisor of the affected area is the acting Incident Commander of the emergency until properly relieved by a member of the Management staff.
2. In the event of an emergency, the Shift Supervisor is responsible for activating the emergency call-out procedure as swiftly as possible, making external notifications, and responding to and securing the emergency situation. The Shift Supervisor may delegate callout and notification activities to a Lead Operator or the Guard. In the absence of the Shift Supervisor, any employee may initiate the call-out procedure.
3. All in-plant personnel should be accounted for as quickly as possible.
4. All employees not directly involved in the handling of the emergency should be assembled in a safe area.
5. No one, other than emergency responders, will be allowed to enter or re-enter the affected area without proper clearance from the Incident Commander.

Subject: Condensed Emergency Instructions

Code: ERP III

Revision: 2

Effective: 01/01/2000

Document is uncontrolled unless "Controlled Document" appears on the right margin of the page.
