Subject: RE: Shanghai Health Study - Follow-Up

Patsy - I very much look forward to talking with you and understanding the recommendations and where we are. I hope being in the jury assembly room turned out OK. Sorry I missed your call. Next week I am in Washington on Monday and Tuesday with API and then at the Woodland for a Shell Workshop Wed and Thur. So I can not unfortunately meet with you on the 21st. I could meet with you at Bellaire are WTC on Friday AM. Our I could call you much of the time on Monday and at lunch on Wed and Thur. Will any of these work. I will be in Washington again on 29 March and will be attending a luncheon not far from the API office. I could easily attend an AM or PM meeting on the 29th. Thanks for keeping me in the loop. I appreciate it!!!

Subject: Shanghai Health Study - Follow-Up

Charlie;

Left you a voice mail prior to sending this email.

We spoke on the telephone several months ago about the Shanghai Health Study. With Shell as a study sponsor and your role as chair of the API Special Programs committee and myself as chair of the Oversight Committee for the consortium of sponsoring companies, Shell certainly has a vested interest.

The study is at a critical point. I would like to be able to meet with you or telecon to bring you up to date. I am actually sitting in the jury assembly room right now, so am not connected to the

Shell system and cannot schedule a meeting. I will be at WTC on Wed, March 21, until 10 AM. I could come by your office on my way back downtown. I will check your availability when I can get reconnected. In the meantime, if you let me know your preference for a meeting or call.

There is a critical consortium/API meeting scheduled for March 29 at API offices in DC. We would like to invite and encourage you or another member of the Special Programs Committee to attend. There is a need to clarify roles and responsibilities of the consortium and API, as well as gain a better understanding of API processes and procedures. We also hope to have a formal proposal from Dr. Richard Irons, the principal investigator, for his requested additional funding.

Looking forward to having an opportunity to discuss in more detail with you.
