

1 And in 1994 they finally finished their
2 study and they published that. And that is the fourth
3 study that I have included. And they have concluded,
4 based on a formal case control study, that there is no
5 increased risk of mesothelioma in garage mechanics.

6 That is a typical story. You start with
7 case reports and then you do formal studies and you
8 reach a conclusion based on studies.

9 Q Doctor, don't the very same authors that you
10 just talked about, Woiderwitz and Rodelsperger, say,
11 if there is a mesothelioma risk for car mechanics and
12 it is small, that they could not detect it in their
13 study?

14 A I look at this very gracious admission that
15 there is no increase of mesothelioma in mechanics,
16 because they have said before in writing that they
17 strongly believe that there was an increase in 1991
18 and in 1992, and now they finish a study which they
19 did not find an increase.

20 Let the numbers speak for themselves.

21 Q What they conclude in their own study, sir,
