

From the people who know gypsum drywall best—

DURABOND® Adhesives for smooth walls and ceilings.

DURABOND Adhesives help produce finer quality room interiors and greater customer satisfaction. With DURABOND, you'll prevent many drywall imperfections caused by fasteners. On ceilings, these modern adhesives eliminate most fasteners. On walls, they eliminate all field fasteners and up to 75% of all fasteners that cause problems when lumber shrinks or distorts.

DURABOND Adhesives provide up to 100% more tensile strength, 50% more shear strength than conventional nailing. They minimize problems of twisted studs and misaligned framing. Maintain bond, remain flexible with age. Absorb stresses from lumber shrinkage and structural movement. Walls and ceilings stay smooth. Customers stay satisfied.

See your United States Gypsum man. Or write us at 101 S. Wacker Dr., Chicago, Ill. 60605, Dept. JH-04.

DURABOND 200 Adhesive: Solvent-based. For wallboard application to wood or metal framing. 1-qt. cartridges and 5-gal. cans.

DURABOND 300 Adhesive: Water-based. For wallboard application to wood or metal framing and polystyrene rigid foam insulation. 1-qt. cartridges and 5-gal. cans.

DURABOND 400 Adhesive: Water-based. For application of prefinished wall paneling to wood or metal framing, furring or existing wall surfaces. 1/10-gal. and 1-qt. cartridges and 5-gal. cans.

DURABOND 500 Adhesive: Water-based. For laminating gypsum wallboard to gypsum board, monolithic concrete, concrete block, wood fiber board, expanded polystyrene or urethane rigid foam insulation and most other wall surfaces. 5-gal. cans.

DURABOND 600 Adhesive: Water-based. For contact lamination of gypsum wallboard in double layer systems. 5-gal. cans.
