*Reserved  
Let Secretary  
know what  
time.*

I have just reviewed a full color videotape rerun of a 30-minute program on PCBs which appeared on WNBC, New York, on Jan. 31.

The program, titled "New York Illustrated," was narrated by Edwin Newman and is a "very heavy" mostly factual indictment of PCBs, G.E., Imports and the EPA in that order, with a couple of harmless references to Monsanto, thrown in!

The videotape is available for viewing on equipment housed in the Corporate Public Relations Department in A3NC. You can arrange for a screening simply by calling Mike Blatz at 4-2582.

I recommend that you see this if at all possible and suggest that viewings be scheduled in groups of no more than four due to the size of the accommodations.

  
D. R. Bishop
