

23—Sources of Help

The *Journal of the American Medical Association (JAMA)* is published weekly, and frequently contains articles on some aspect of occupational health.

The *AMA Archives of Environmental Health* is one of the ten specialty journals of the American Medical Association. This monthly publication contains articles on the socio-economic aspects of occupational and environmental health, toxicology, industrial hygiene, air pollution, radiation, and numerous other subjects of interest to the safety engineer.

American Nurses' Association, Inc.

2420 Pershing Rd., Kansas City, Mo 64108

The American Nurses' Association is the voluntary membership organization for all registered nurses. The Division of Community Health Nursing Section is the component of the ANA which provides authoritative information about the practices of occupational health nursing. The objectives of the division are to improve community health nursing practice including occupational health nursing practice for better employee health care and also to improve the economic and general welfare of members.

Publications of interest are "Functions, Standards, and Qualifications for Occupational Health Nurses," "Guide for Development of a Manual for an Employee Health Program," and "Selected Areas of Knowledge or Skill Basic to Effective Practice of Occupational Health Nursing." Titles of other brochures, pamphlets, guides, and articles are included in the association's publications list which will be sent on request.

American Psychiatric Association

1700 18th St NW, Washington, D C 20009

This association is concerned with research in all phases of mental disorders, standards of psychiatric education, and the medico-legal aspects of psychiatric practice. It publishes the *American Journal of Psychiatry* bi-monthly.

American Public Health Association

1015 18th St NW, Washington, D C 20036

This multidisciplinary, professional association for health workers, through its monthly *American Journal of Public Health* and other

publications, distributes safety information to those responsible for state and community health-service programs. One of the program area committees is devoted to injury control and emergency services.

American Society for Industrial Security

2000 K St NW, Washington, D C 20006

The American Society for Industrial Security, a professional Society of industrial security executives and supervisors, has more than 50 chapters in seven regions. Committee activities that would be of interest to the safety professionals are safeguarding, classified information, classification management, safeguarding proprietary data, physical security, subversive activities in industry, emergency planning, investigations, fire protection, and public relations.

The society publishes the magazine *Industrial Security* bimonthly and issues a newsletter to its members monthly.

American Society of Mechanical Engineers

345 East 47th St., New York, N Y 10017

This Society, the professional mechanical engineers' organization, encourages research, prepares papers and publications, sponsors meetings for the dissemination of information, and develops standards and codes necessary in this phase of engineering.

The Society sponsors the following code under the procedures of the American National Standards Institute:

Safety Code for Elevators,
Safety Code for Mechanical Power-Transmission Apparatus,
Safety Code for Conveyors, Cableways, and Related Equipment,
Safety Code for Cranes, Derricks, and Hoists,
Safety Code for Manlifts,
Safety Code for Powered Industrial Trucks,
Safety Code for Aerial Passenger Tramways,
Safety Code for Mechanical Packing,
Safety Standards for Compressor Systems,
and
Safety Code for Garage Equipment

The society also sponsors a committee on the *Code for Pressure Piping and Scheme for Identification of Piping Systems*. In addition, ASME is represented on 30 other safety code committees under the American National
