RE:

Dear Dr. Fischer:

This sixty-four (64) year old man is known to you from 1984. He is about to retire and is concerned about his asbestos-related pleural plaques. He remains asymptomatic. He requests an update evaluation by you as part of his last physical prior to retirement. Of course, he is eligible for annual physicals here for the rest of his life.

We request your update evaluation of this nice gentleman. Please advise him as you consider appropriate, and inform us of your findings and recommendations.

We look forward to hearing from you.

Sincerely,
