

"Glovebags are recommended by the EPA and used by the U.S. Navy"

NANCOL ENTERPRISES, INC.

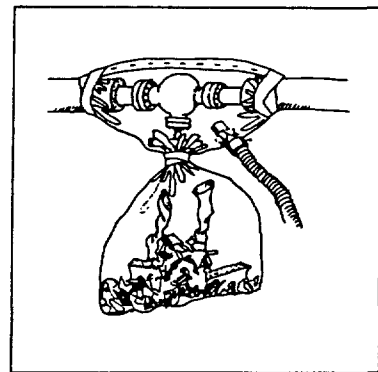

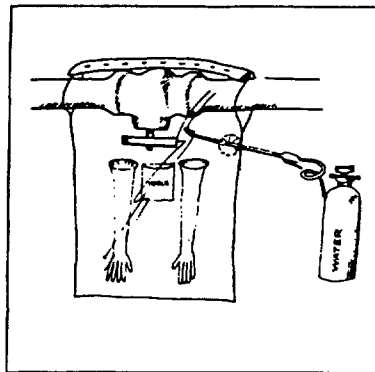

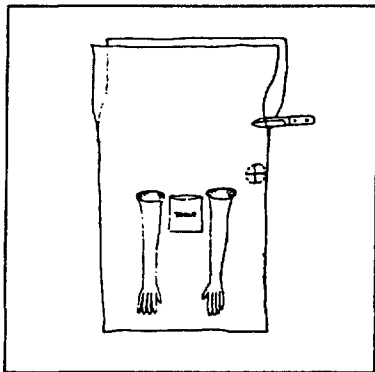

Presents

SAF-T-BAG™

SAF-T-BAG is a solution to working in cramped quarters or performing small quick asbestos removal jobs on piping, while at the same time preventing worker exposure and preventing asbestos fibers from escaping into the atmosphere.

SAF-T-BAG can reduce problems with glove, sleeve and bag separation at the seams, common to other glovebags, thereby providing greater protection for workers.

SAF-T-BAG is the perfect alternative to area isolation or the use of negative pressure, allowing other work to continue nearby.

SAF-T-BAG CAN SAVE YOU TIME AND MONEY!

LAM 001251

- 8 mil 100% pure virgin polyethylene bag
- 44" x 63" size bag for horizontal use, or
- 63" x 44" size bag for vertical use.
- Bigger pouch to hold gaskets and tools.
- $\frac{3}{8}$ " heat seal used on the SAF-T-BAG.
- Can be used on successive sections of pipe.
