DOCUMENT DESCRIPTION: Trade Journal Reference Documenting Knowledge of Preventive Measures

Knowledge of Preventive Measures

Date: May 1934

Source: Mr. W. Bain at the Joint Meeting of the Refractories Association of Great Britain, in The Refractories Journal

Quote: “Silicosis and **Asbestosis** actually **touches** miners, stone-masons, **asbestos workers**, grinders and pottery workers... In Sheffield, you have been faced with the problem for many years, but workers in the Asbestos Industry have only been faced with it during the past few years, and **new developments have now taken place to safeguard the worker by ventilation.**”
[emphasis added]
