Re: Michigan Bell Telephone Job

Dear Mr. Elrod:

Perhaps by now you are aware that there has been concern over asbestos containing building materials, and for the most part they have been outlawed. Most acoustical plasters, if not all, have fallen into this category since they contain minor amounts of asbestos.

We have been aware of this problem and for the last year and a half have been working on a new Kilnoise that was asbestos free, even though the amount of asbestos was very minor. We are just finishing up our test work. There was a period during the fourth quarter of 1972 that Kilnoise was unavailable, but it is now available, even though all our test data is not complete.

I understand from our sales representative, Grant Thomson, that about 300 square yards of Kilnoise will be required on the Michigan Bell Job and I am happy to say that Kilnoise will be available. I look forward to having Kilnoise used on this job, as well as others that you may be associated with in the future.

Very truly yours,

Harry E. Rourke
