REFRIGERATION, STEAM JET VACUUM

• Condenser Service & Eng'g Co., Inc., 85 River St., Hoboken, N. J.

For additional information about products of manufacturers

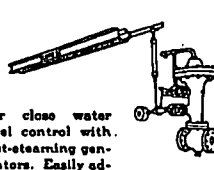

COPIES FLOWMATIC CONTROL

AIR-OPERATED

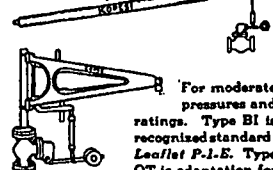

For remote control, feed water regulator valve may be at any convenient location with respect to the water level thermostat. Permits manual reset of water level from operating panel. Suited for two-element COPES Flowmatic or for single-element simple level control. Write for Bulletin 471.

DIRECT-OPERATED

For close water level control with fast-acting generators. Easily adjusted and maintained. Bulletin 429-B. For high duty boilers, write for Bulletin 441.

COPIES SIMPLE LEVEL CONTROL

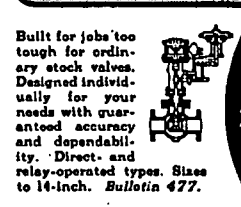

For moderate pressures and ratings. Type BI is recognized standard; Leaflet P-1-E. Type OT is adaptation for small boilers. Leaflet P-2-A.

DESUPERHEATERS

As accurate on light flows as on maximum loads. Complete atomization of cooling water over full range of operation, because flow is controlled at point of dispersion, not by an outside valve. Complete self-contained unit. Write for Bulletin 405-A.

COPIES PRESSURE REDUCING VALVES

Built for jobs too tough for ordinary stock valves. Designed individually for your needs with guaranteed accuracy and dependability. Direct- and relay-operated types. Sizes to 14-inch. Bulletin 477.

COPIES FEED WATER REGULATORS and ALLIED EQUIPMENT

ERIE PA.

COPIES MASTER PRESSURE CONTROL

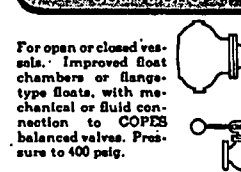

For installations where a common reduced pressure must be maintained at two or more places in your steam or water system, or where a single reducing valve must be installed some distance from the pressure controller. High degree of accuracy is assured by sensitive response to slightest pressure variation. Four types, for reduced pressures from 2 to 600 psig. Described in Bulletin 477.

COPIES BALANCED CONTROL VALVES

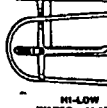

Practically frictionless and closely balanced. Ports designed for individual installation. Ideal for use with solenoid or float operator. Ask for Leaflet P-3-B.

COPIES HIGH-LEVEL CONTROLS

For open or closed vessels. Improved float chambers or flange-type floats, with mechanical or fluid connection to COPES balanced valves. Pressure to 400 psig.

COPIES HI-LOW WATER ALARM

Designed for high pressures, operates dependably at any pressure from 1500 psi down to 23 psi. Gives protection during start-up and shut-down periods. Unaffected by ambient temperature changes. Has no internal parts to wear or become fouled. Easy to install and maintain. Leaflet CN 205-002.
