PATRICK R. ATKINS

Dear Pat:

I am enclosing a rather long list of asbestos reference papers (nineteen in total, fourteen of which are Quebec based) for your review. These deal primarily with health issues and a few with environmental topics. Although I have not read them these papers should give you a good overview of the asbestos research work done in Quebec.

*Quebec is the largest
asbestos producer in the
world*

Yours very truly,

Hennie

Boff / Laura Rappin

*The attached articles are very pro-asbestos
They essentially say that asbestos is O.K. at exposure of
less than 2 fibers/ml and that chrysotile asbestos is
not harmful at all -*
