SIER-BATH SCREW PUMP
Advantages - pulseless flow - vibrationless operation - low maintenance cost - rugged construction

SIER-BATH GEAREX PUMP

Believed Axial Thrust - Pulseless Flow - Vibrationless Operation - Better Bearings for Precision Running under load.

Pumps: Oils, Varnishes, Solvents, Molasses, Chemical Solutions.
Capacities: 1-150 g.p.m.
Discharge: 250 p.s.i. for medium or high viscosities. 80 p.s.i. for water.

**MADE BY
ROTARY
PUMP
SPECIALISTS**

SIER-BATH Screw Pumps and Gearex Pumps are made in a plant keyed to precision methods of gear manufacturing. Our engineers have a long background of experience specializing in the design of rotary pumps. As a result, the high quality of these pumps enables them to operate for long periods without maintenance. Their pulseless flow and vibrationless operation mean less wear on valves, couplings and other fittings. Pipes and joints remain tight. In every way, the Sier-Bath Screw and Gearex Pumps are constructed to render reliable and continuous service, with least possible maintenance. Write for detailed information.

tion to Cochrane water-conditioning equipment and steam specialties already handled in western Ohio, nearby Ind. and eastern Ky. Individuals serving this territory include Herbert H. Haas, John S. Bower and Kenneth C. Matthews.

National Supply Co. has elected Carl J. Collins a director of the company for a 3-year term. He succeeds T. H. McGraw Jr., who has retired from the board. Henry Chalfant, Edward H. Green and William B. McFall were re-elected directors for 3-year terms.

Johns-Manville Corp. has named George R. Frankland Chicago district manager of industrial products div. Frankland succeeds Corydon H. Hall, who resigned April 1 to become president and chief executive officer of a new company being organized in Calif. William S. Hough assumes Frankland's former duties in Chicago as assistant district manager, industrial products div.

E. R. Godfrey has been made group executive in charge of Dayton and household appliance divisions of General Motors Corp. He will make his headquarters in Detroit. Mason M. Roberts succeeds Godfrey as general manager of Refrigerator div. B. D. Kunkle, vice-president of General Motors, who is now group executive in charge of overseas, Canadian, Dayton and household appliance group, will continue as group executive of overseas and Canadian operations and in addition will have other special assignments. George D. Mitten has been named manager of Argonaut ready div, succeeding the late Fred H. Linschold.

General Motors Corp. has appointed Laurence F. Ducey general sales manager of Detroit diesel engine div. In addition to his new responsibilities, Ducey will continue to serve as organization and analysis manager. Recent personnel changes at Bristol, Conn., plant of new departure div are as follows: (1) William J. Ryan becomes assistant to general manufacturing manager. (2) Harry Simpson has been appointed acting mechanical superintendent. (3) Harold Draper has been named senior engineer (research or experimental, or both) in mechanical dept. under direction of mechanical superintendent. (4) Herbert A. Maronn becomes abrasive supervisor for all departments. Maronn will work directly out of office of Bristol Factory Manager A. F. Herold.

Albert Sobey has been named president and a member of General Motors Institute at Flint, Mich. New officers of board of regents are: (1) Chairman: H. J. Klingler, vice-president of General Motors and general manager of Pontiac motor div, Pontiac, Mich. (2) Vice-chairman: L. C. Good, General Motors vice-president and general manager of Fisher Body div, Detroit. (3) Treasurer: M. L. Penita, treasurer of General Motors. (4) Secretary: A. F. Power, assistant general counsel, General Motors, Detroit. A new executive committee has also been created to help guide the institute's future development. Its members are the chairman and vice-chairman of board of regents, plus S. E. Skinner, GM vice-president and general manager of Oldsmobile div, Lansing, Mich.; H. B. Coen, vice-pres-

It's easy to install!

TYPE Y COMPRESSOR

Shipped intact as a "package unit," ready for external connections, a CP Type Y Compressor can be set up quickly with minimum expense. It needs only a simple foundation, and requires no special skill to align and install it. Its compact design renders it ideal where floor space is restricted.

It operates at high efficiency with low maintenance because of such features as large area Simplate

valves... multi-step capacity regulation... effective inter-cooling... precision bearings... force-feed lubrication.

Available with built-in or direct-

coupled motor, or with V-belt drive, in capacities of 500 to 900 c.f.m., at 80 to 125 pounds pressure. Sizes for other pressures also furnished. Write for full information.
