

FOSECO, INC.

INTER-COMPANY AND INTER-DEPARTMENTAL CORRESPONDENCE

TO: Don Marino
FROM: Arsen Santighian
DATE: July 15, 1974.
SUBJECT:

I understand the necessity of having a second source of fiber supplier, but "Hedman Fiber", in my opinion, is the last to be considered because it is, in fact, Asbestos.

My opinion in that subject matter is:

1. A written contract with Interpace to avoid any displeasure in F₁ type Wollastonite supply.
2. To initiate a research program of finding out the possibilities of milling West Coast Wollastonite in order to get a F₁ type Interpace Wollastonite.
3. To install an adequate mill in Cleveland or Mt. Braddock plants in order to use Interpace or West Coast raw Wollastonite in converting it to F₁ type (the cost could be evaluated at around \$150,000 returnable in around 1 year).
4. Giving higher consideration to Profax 2000 or other similar ideas in which not to use F₁ type of Wollastonite.
