Attention: Mr. Edward L. Jensen
Purchasing Manager

Gentlemen:

In the course of our assuming the business of the former International Talc Company, we will continue to market five fibrous (asbestiform) type talcs previously supplied by them, namely:

1. Fiber #1
2. Fiber #2
3. Mouldane
4. 6N Fiber
5. PL Fiber

We intend to label bags containing these products with an Asbestos CAUTION Label as follows:

CAUTION-PRODUCT CONTAINS
ASBESTOS FIBERS. AVOID
CREATING DUST. BREATHING
ASBESTOS DUST MAY CAUSE
SERIOUS BODILY HARM.

As you know, the mineral fibers present in these grades, which make them industrially useful, are the asbestiform varieties of those minerals normally contained in commercial talc and consequently fall under Section 1910.93a, the OSHA Asbestos Standard.

Very truly yours,

Date 10-15-99 Exhibit # 5
