AIRMAIL.

PRIVATE - (P.503)

22nd February, 19

The Manager,
MITTENOOM.

Dear Sir,

ASBESTOSIS: We have been advised by Mr. Brimbane, State Mining Engineer, that he proposes to instigate a thorough ventilation survey of the mine within the next month or so, as a result of a complaint from the Commonwealth Health Laboratory dealing with asbestosis.

It is understood that there are four employees of ours now inmates of the Perth Chest Hospital suffering from "Asbestosis". Will you please let us have the names of these employees and, wherever possible, their industrial history.

General Superintendent.
