NAME

Seattle

TITLE

LOCATION

Harry Brown

Superintendent

Cheyenne, Wyoming

I received a call from Mr. Brown that it was going to be necessary to clean Tank #14, which is a 25,000 barrel "Ethyl" storage tank. Complete details covering this operation have been covered in the regular tank cleaning report.

Mr. Brown also advised me that their Mr. Jay Olvey, chief chemist, had received a letter from a Mr. Charles Harkins, an Attorney at Worland, Wyoming, asking if TEL poisoning could be contracted by handling loaded regular gasoline. Mr. Brown advised that they wrote Mr. Harkins and stated they knew nothing of this problem and recommended that he contact me. To date I have not heard from Mr. Harkins.

This all ties in with the [REDACTED] case at Thermopolis, Wyoming since Mr. Harkins is the Attorney for Mr. Langshaw.

I shall "sit tight" on this whole matter until Dr. Sanders arrives in this territory, which should be about the latter part of June, and at that time we can go into the matter in more detail. In the meantime, should I hear from Mr. Harkins, I shall pass the information along.
