Re: Air Quality Assessment Report # 791
Crane Packing Co. Ltd.

The air sampling results have been reviewed. From the data presented undue exposure to Lead and Asbestos did not exist at the time of the sampling. The levels of Lead and Asbestos measured then, were well below the adopted Threshold Limits of 0.15 mg/m^3 and 5 fibers/cc greater than $5 \mu\text{m}$ in length respectively.

An Occupational Health Consultants visit is not indicated at this time.

/ep

D.C. Murray
