Subject: Fluoropolymer Product Group - Possibility to Meet after Pre-Publication of Dossier

Dear 5.1.2e,

It was good to speak with you on Friday. Thank you for the chat.

I confirm that the Fluoropolymers Product Group (FPG) would welcome a meeting with you and colleagues following the pre-publication of the PFAS restriction dossier in February next year. If the dossier is publicly available in the first week or two of that month, then we could foresee FPG inviting you to Brussels in mid-late February.

As mentioned such a meeting would be useful to look at the proposal and ask you for clarifications where they might be needed, and you mentioned there may be some information requests to industry where gaps in your knowledge need filling. FPG will be looking to organise a webinar with the fluoropolymer value-chain in late-February/early March to share their first views on the proposal, and it would be great to relay messaging from a meeting with you to the companies.

We look forward to hearing from you following the 19 December meeting between the 5CA, and hope we can meet with you in February.

Best,

5.1.2e e
