Comments: (Corrective action taken or recommendations)

Material is in plant to do this job will put manpower on this job when maint coordinator gives this job priority

Supervisor E Boley Date 11-14-84

DEPARTMENT HEAD

The Department Head uses this section for his comments regarding the corrective action taken or disposition on the reported condition.

On completion he routes the copies as specified below.

Comments:

This UCR has been bouncing around trying for answers.
1. This line has two layers of insulation (due to an energy program past). The first layer is asbestos, the second layer, or cover layer is not, so it may not be asbestos falling.
2. The job itself is not too big, but the size and location will cause us to use 4 insulators and it certainly is a priority issue.
3. Maint. will make an effort to complete this the week of 12/10/84 Papa J. Boley

Department Head [signature] Date 12/4/84

Canary—Dept. Head retains for file.
Pink—To Originator of Report through his Supervisor.
