BY MR. McGOWAN:

Q How many fibers per cc did you expose your animals to?

A About 1,000.

Q Cc here?

A Yes.

Q Doctor, are you aware that -- we have mentioned terms in here about particles per cubic foot.

How many ccs are there in a cubic foot?

A I have never done that.

Q Doctor, are you aware that five million particles per cubic foot equals about 30 particles per cc?

Do you remember testifying to that?

A I have heard that, yes.

Q All right. So if that TLV is five million particles per cubic foot, that converts into 30 million particles -- 30 particles per cc, correct?

A Right.

Q And you exposed them to this kind of a
