SUBJ: MODELING RESULTS

VISTA

Enclosed is a proposed format for the modeling results. Mary Jo is close to finishing the scenarios and we need to assure we're in agreement on the "end product" you receive.

Each plant will receive one three ring binder with the items described in the attachment. One master copy of all scenarios will be sent to Mike Hayes. The hard copies of the contours included in the binder will allow you to do what you want with those scenarios, such as getting enlargements made for training or control room use. Please call Mary with your comments by June 5.

After you receive the books we will schedule a meeting to review the results and discuss future needs.
