Facts about RE•NU•IT Exterior Wall Resurfacer

DESCRIPTION: RE•NU•IT Exterior Wall Resurfacer is equal in thickness to more than ten coats of paint and solves many costly maintenance and repair problems by rejuvenating, insulating and protecting cracked, porous and weatherbeaten buildings constructed of concrete, stucco, brick, cement and cinder block, asbestos, metal, wood, etc. RE•NU•IT adds new life and beauty, eliminating painting, re-stuccoing, re-siding and also can be used with equal success on new construction to resurface and decorate interiors as well as exteriors.

COMPOSITION: RE•NU•IT Exterior Wall Resurfacer contains a chemical base incorporating asbestos, mica, silicious minerals, pure earth, chemically treated pigments, titanium dioxide and mildew inhibitive, all of which are imbedded together in a waterproof vehicle and formulated in such a manner as not to act as a vapor barrier but allow the walls freedom to breathe.

APPLICATION: Although originally developed to be pressure applied, RE•NU•IT is now available for brush as well as spray application and is applied at the rate of a minimum of one gallon per sixty square feet of surface, in accordance with the specialized process outlined in our Instructions and Application Bulletin.

GENERAL: RE•NU•IT Exterior Wall Resurfacer is available in eleven attractive colors and carries a ten year material replacement guarantee against cracking, peeling and chipping. It is especially recommended for masonry surfaces, as it is heavy enough to fill hairline cracks and other surface defects and yet contains no cement; thus allows for normal expansion and contraction.

AND RESURFACING CRACKED POROUS WALLS**

RE-NU-IT CORPORATION

424 WEST 42nd STREET • NEW YORK 36, N. Y.

LOngacre 3-6631

Dear Sir:

As you know, troublesome problems are created by exterior walls that through exposure have become cracked, weatherbeaten, unsightly in appearance and in need of being protected, beautified and insulated.

In view of the above, we are taking this opportunity of acquainting you with the merits of our product "RE*NU*IT EXTERIOR WALL RESURFACER" as described in this brochure.

RE*NU*IT contains the two indestructible, protective and insulating minerals - asbestos and mica - which are combined together in a waterproof vehicle. Formulated on the principle of allowing the walls freedom to breathe, RE*NU*IT solves costly maintenance and repair problems and eliminates painting and re-stuccoing.

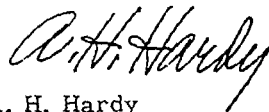

RE*NU*IT has been used extensively here and abroad on leading commercial and industrial structures; also on Army, Navy, Air Force, Marine Corps, Veterans Administration and other Federal and State projects, and carries a ten year material replacement guarantee against peeling, cracking and chipping.

On the back page we have outlined facts pertaining to the use of our product for exterior resurfacing work. If you would like to receive additional information, suggested specifications and sample showing the actual application of RE*NU*IT, kindly fill in the enclosed reply card or phone or write us at the above address.

Trusting we may have the pleasure of hearing from you in the near future,

Very truly yours,

RE-NU-IT CORPORATION

A. H. Hardy
Vice President

AHH:sm
Enc.

P.S.-RE*NU*IT is also highly recommended on new construction for resurfacing and beautifying the interiors and exteriors of cement and cinder block structures and greatly reduces costs by eliminating the necessity of plastering and painting.
