

Lead Stabilizer

March 19, 1962.

Mr. W.O. Nicoll,
Assistant Manager,
Imperial Paper & Color,
St. Johns, P. Q.

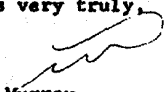

Dear Bill:

This will acknowledge with thanks your letter of March 15/62
on the subject of lead chemicals.

The data contained in the brief to which you refer, dates back
some time now, and we are quite actively engaged in the sale
of several lead base stabilizers. We have made arrangements
as indicated in the brief for their manufacture on a toll basis
in Canada, and to date they seem to be working out quite satis-
factorily. While we appreciate your interest in these chemicals,
we are adequately taken care of so far as we can judge at present.

It was very pleasant meeting you in St. Hyacinthe last June and
I hope that Norm Ray will persuade you to come again this Summer.

Yours very truly,

R.F. Murray
Assistant to the General Manager.
