Subject: [EXTERNAL] DOE event follow up - data center cooling and critical minerals

Hello Lou

It was great to meet you yesterday at the DOE Better Buildings Better Plants Summit. The DOE partnerships have been so valuable to us both in supporting energy efficiency efforts across our sites and convening value chains to align on industry challenges.

We are very excited about the potential for Chemours products to support US competitiveness in Artificial Intelligence and Critical Minerals. I am copying my colleague, Mary Cordes, on this email as she has been in conversations with your team already. We would love to come to DC and have a conversation with you on both Chemours critical minerals and our new heat transfer fluid for liquid cooling in data centers, Opteon™ 2P50. Can you point us to who we can work with to get on your calendar?

Thanks and have a wonderful weekend.
 Amber
