Mr. J. T. Knorpp
Area Director
Dallas Area Office - OSHA
1425 W. Pioneer Drive, Suite 230
Irving, TX 75061-7181

Dear Mr. Knorpp:

Our progress is moving along according to the compliance schedule. Our preliminary test on the 2-3-4 sand slinger machine looks good. We are still making adjustments, hopefully making the system more effective.

The work on the 4-5-6 sand slinger machine is on schedule and we hope to take our first samples in the next couple of weeks, production schedule permitting.

We continue to require respiratory protection in these areas to ensure, that our employees are protected.

If there is any additional information needed, please feel free to contact us.

Sincerely,

TYLER PIPE INDUSTRIES, INC.

Charles Kuenemann
Safety and Security Manager
