CHICAGO LEAD ELIMINATION

Attached is a list compiled by Walt Bennis. It states each one of the Y-line products sold out of Chicago. It also presents the source of each of these products relative to location manufactured or buy-out.

Obviously we must coordinate our efforts with the production department, the sales department and inventory control, to be certain that products containing lead are eliminated from the Chicago market place.

Will you, therefore, please examine this list to identify products which have not yet been reformulated for lead removal and take whatever steps are necessary to work with the departments involved in an effort to reformulate or remove from the market place any high lead content products.

Mr. R. J. Haviland, Mr. D. W. Eugene, and Mr. L. Nusser should be your contacts in their respective departments.
