Cost Estimate for 4-Day Fish Toxicity Study on Aroclors 1242, 1254, 1260

The cost of this project should be a minimum of $2400 ($600/species) and preferably $2700 ($450/species).

The cost breakdown is:

A. Equipment

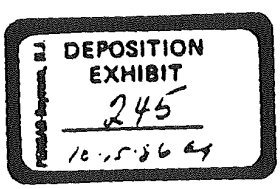

1.	Sixty (60) New Bioassay Vessels	$ 350
2.	Twenty-four (24) Dozen Amber Bottles (4 oz.) with Foil-lined Caps	70
3.	Miscellaneous (glassware, specimen collecting devices)	50

B. Labor

1.	Six (6) LC_{50} -	$ 1500
2.	Collection, Labeling and Shipping of samples, 16 hours x $20. = $320.00 (assumes that Monsanto will pay freight bill)	320
	Total	$ 2290
