include insulating materials, packings, refractories, gaskets, and many other items, used by the great industrial plants of the East-

M. A. CLUNE, Bay and Northern California. M. A. Clune, for many years vice-president of the company, is in immediate charge of the department, and William Moon, a well known figure in industrial circles, is associated with the company.

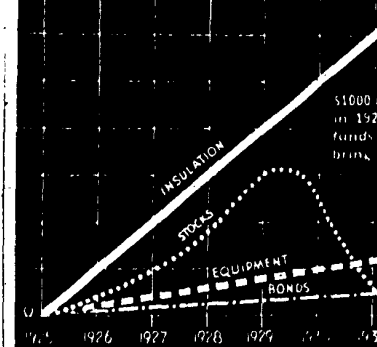

"The growth of our business has been almost phenomenal," states Clune, "and we credit much of our success to the quality of the products produced by the J-M. Company. There is unquestioned acceptance of these products offered; the quality is never doubted."

Close cooperation with the Johns-Manville offices in San Francisco

is constantly maintained, a condition that must necessarily exist on the part of all distributors to retain the distributing franchise, according to W. R. Jones, manager of the Pacific division, power products department, of the manufacturing concern. "We are highly gratified at the manner in which the Oakland company serves Northern California industrial plants, and the splendid facilities that they maintain for that purpose," states Jones. "They are assured of our continued support in the industrial field they cover."
