William A. Coughlan, Esq.
Assistant Attorney General
State of Idaho
P. O. Box 1632
Boise, Idaho

Rock wool - Pneumoconiosis

Dear Mr. Coughlan:

I have noted your letter of the 1st and wish to advise that the study conducted by the Industrial Health Section of the Metropolitan Life Insurance Company was under the direction of Dr. William F. McConnell, Assistant Medical Director of that Company. However, as this investigation took place in 1936, I do not know whether Dr. McConnell would still be associated with the Metropolitan Life Insurance Company. If you direct a letter to the Industrial Health Section of that Company, perhaps they can be of service to you.

Our records indicate that Dr. Anthony J. Lanza was associated with Dr. McConnell in this study. Dr. Lanza is at present the Chairman of the Institute of Industrial Medicine, New York University, Bellevue Medical Center, 317 East 34th Street, New York 16, N. Y. Perhaps he may be of assistance to you if the Metropolitan Life Insurance Company is unable to supply you with information.

Very truly yours,

Arthur L. Fisk, Jr.
Assistant General Attorney
