GENERAL ANNOUNCEMENT

SUBJECT: Proposed Asbestos Ban

Dear Customer:

We have received numerous inquiries during the last several days from concerned customers regarding recent newspaper, radio and television reports on the asbestos content in spackling and patching compounds. We feel sure you are also experiencing the same from your customers which prompts this announcement.

Synkoloid's Interior and Exterior Spackling Pastes have never contained asbestos. This also applies to all Synkoloid interior patching and resurfacing compounds in powder form.

A few Synkoloid products containing asbestos were reformulated over 12 months ago to non-asbestos compounds. As a result, no product produced by The Synkoloid Company contains asbestos.

We are most happy to be able to bring this important information to your attention.

THE SYNKOLOID COMPANY
