A/C Air Duct Pipe - Plant 258 Only

Purpose:

VOID

This Advance Standard Product Specification is being issued as a basis for developing Standard Costs and are being issued only to Headquarters and Plant 258 personnel. The desire to re-enter the Air Duct Market was initiated by Mr. Duffy's letter to Mr. Streepy on 9-6-80, Mr. Streepy's reply of 10-2-80 and Mr. Duffy's additional letter of 10-6-80. Therefore, this Advance Specification is a preliminary step to establishing the Standard Product.

Background:

CertainTeed had withdrawn from the Air Duct Market (4" through 16") in 1969. There had been some underlying problems in trying to continue to service the market when the demand had shifted to far more stringent demands on tolerances than we could meet. Additionally, the FHA had begun to require better joining methods, and there had also been raised the subject of asbestos fiber being introduced into the home or office atmosphere.

Current:

The attached specification is patterned after the original specification plans adding 18", 20" and 24" pipe. The wall thicknesses, furnishes and tolerances were discussed and approved by Mr. Benhardt as a reasonable starting point.

It cannot be over emphasized that the products going to customers must be free from fibrous particles that could lead to any type of complaint.

The joining system will have to be resolved. A Stevenson type of coupling has been suggested, and once the dimensional parameters have been agreed upon, CertainTeed can negotiate for the required quantities.

Since it is anticipated selling these pipe products through a distribution system that manufactures their own fittings, CertainTeed will not need to furnish any fittings.

Disposition of Superseded Pages:

None, this is the initial specification.

DESCRIPTION:						
A/C Air Duct Pipe - Plant 258 Only						
1.0 <u>General:</u> This Advance Specification is being issued in order to set forth the anticipated requirement for the kinds of pipe that will have to be manufactured in order to re-enter this market. This Specification covers sizes 6" thru 24"; the 18", 20" and 24" sizes being additions to the previous product line. The proposed dimensions and furnishes have been discussed with Mr. Benhardt and he has agreed that the proposal is proper for this initial venture. The pipe will be square cut and clean of dust. The coupling will be an outside purchased item. No fittings are required. 2.0 <u>Composition:</u> Air Duct pipe shall be composed of an intimate mixture of portland cement, asbestos fibers and silica. The material shall be of laminar construction formed under pressure to a homogenous structure and cured to meet the physical and chemical requirements of this specification. The pipe shall be free of organic additives. 3.0 <u>Type:</u> The pipe shall be Type II. 4.0 <u>Physical Requirements:</u> CTD014172 4.1 <u>Appearance</u> 4.1.1 The I.D. shall be free from dents or tears that result in a variation in diameter of more than 3/16 inch from the diameter of the adjacent unaffected portion. No water marks are allowed. 4.1.2 Some external denting is allowed on the outside (B.O.D.) of the pipe providing there are no cracks connected with the dents. 4.1.3 Pipe ends shall be cut clean, with no "lace curtains".
