The following information came from a meeting held with Jack Carlisle August 22, 1980 concerning an office safety presentation.

Mr. Carlisle feels this information concerning emergency preparedness is a superb idea and would like us to hold the meeting before January. He feels this session is so urgent, due to the many new people in the plant, that we should go forward with this presentation as soon as possible.

Further suggestions from Mr. Carlisle were to begin each session with the emergency procedure plan in general, evacuation routes and how emergencies are monitored for personnel safety.

I asked Mr. Carlisle if he would be available to speak to each group and he stated he would be glad to do anything to assist our committee.

Since I will be on vacation when the committee next meets, I would appreciate you relaying this information to the group.
