SHADOW-ACCENT

ASPHALT SHINGLES

PLAINTIFF'S EXHIBIT

USG-1209

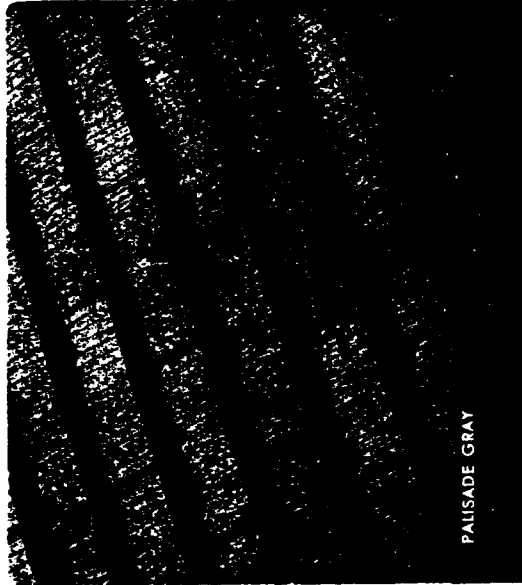

Here's the ultimate in good looks and lasting protection—a roof of SHADOW-ACCENT shingles. They're *color-toned* for western homes so that deep shadows separate the courses, creating a roof that adds to the low, comfortable spread of western architecture. Available in four soft pastel colors, these premium-quality shingles blend with any home exterior. What's more, they give your home maximum protection

because the thick tabs are made extra-heavy at the weather end to resist wind, wear and water; and have a surface of mineral granules that resist fire. Make *your* next roof a typical western roof of beautiful USG Shadow-Accent shingles.
