RE: Finalizing Comments on the Vinyl Chloride Toxicity Profile

MESSAGE

At our April 23rd meeting, we reviewed the draft letter Caffey Norman prepared on ATSDR's Vinyl Chloride Toxicity Profile. During the meeting, members requested extra time to review the letter. Since then I have received one additional set of comments from Jay Strange.

I plan to call Caffey Norman early next week and ask him to finalize the letter. If there are any additional revisions you wish to have included, please send them to me by COB, Friday, May 9th.

Thank you for your help with this project. As always, if you have any questions, please call me at 703/741-5639.

Dear Ms. Sherman:

RE: ATSDR'S TOXICOLOGICAL PROFILE

Listed below are the corrections for Georgia Gulf Corporation as they apply to the ATSDR's Toxicological Profile for Vinyl Chloride.

The Delaware City Plant is now owned by Kaneka Delaware Corporation and the maximum storage capacity for the Georgia Gulf-Plaquemine Facility is thirty (30) million pounds.

I hope this information is helpful. If you need further assistance please let me know.

Sincerely,

A handwritten signature in cursive script that reads "Jay Strange".
