Q And in those six cases, Dr. Hammar, were you able to document that particular -- those six individuals' exposures, occupational exposures?

A Yes, relatively good.

Q What types of exposures did those six individuals have?

A They basically were auto mechanics who spent a significant time of their life working with either -- doing brake-type jobs, or replacing and repairing clutches.

Q And did the exposures, the occupational exposures for those individuals, involve exposure to chrysotile products?

A Yes.

Q In each of those cases, were the exposures and the disease fatal for those individuals?

A Yes.

Q Now, based upon that -- your own training, your own research, your own review of that type of material, do you have an opinion, to a reasonable degree of medical certainty, as to whether friction
