Robert A. Kehoe, M.D.
Professor Emeritus of
Occupational Medicine
Kettering Laboratory
College of Medicine
University of Cincinnati
Cincinnati, Ohio 45219

Dear Dr. Kehoe:

Thanks for the notification that Mr. Combe may be contacting me. I remember well the conduct of this study, particularly the problems with the University's Committee on Ethics for Human Experimentation. If Mr. Combe does request some comments from me, I will then contact you regarding a copy of the report.

My last visit to Cincinnati was to present a lecture on animal models for a symposium in the Department of Laboratory Animal Medicine held at the Burns Institute. It was a rush trip and I was sorry to miss seeing you as you had left your office for an appointment on that Friday afternoon.

Hope that you were able to make the meeting on trace metals in Missouri with Stan Gross and that you had an enjoyable time. Give my regards to Mrs. Kehoe. I will look forward to seeing you on my next trip to Cincinnati.

Sincerely yours,

Emil A. Pfitzer, Sc.D.
Associate Director
Experimental Pathology & Toxicology
