I. INTRODUCTION

This report covers special spectroscopy studies carried out by the Spectroscopy Group at St. Louis during 1969. The individual report sections were issued on a continuing basis during 1969. These special studies were undertaken to solve spectroscopy problems encountered by the business groups of the Organic Chemicals Division.

II. GENERAL SUMMARY

Six special spectroscopy studies were undertaken and completed during 1969. The studies provided data for Organic Chemicals Division projects from the CELLU-CHEM, FUNCTIONAL FLUIDS, PETROLEUM ADDITIVES and PLASTICIZERS business groups. This work is covered by PA TC-03 for the spectroscopy group, Job No. 8903309.

III. NEW COMPOUNDS FOR SRC

No new compounds were prepared or procured in the course of these investigations.

IV. SPECIAL SPECTROSCOPY STUDIES

This work is further summarized under each of the appended specific reports.

(Special Studies 69-1 - 69-6)
