

For a dependable and economical air supply

The Type TB horizontal, straight-line, double-acting compressor has proved its dependability through years of satisfactory service. Moderately rated, it can always be counted upon for continuous, economical operation, low maintenance, and long life.

Simple valves . . . liberally water-jacketed cylinder and heads . . . adjustable, tapered roller main bearings . . . double-counter-

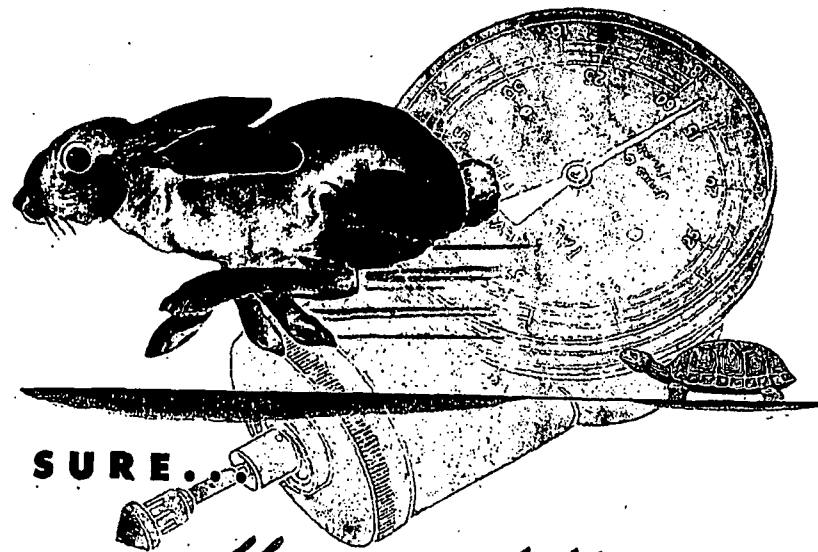

weighted crankshaft . . . are some of the features that have made it outstanding.

Type TB Compressor is furnished in sizes from 89 to 1937 c.f.m., with V-belt, flat belt and direct-connected synchronous motor drive. Single and multi-stage designs for pressures to 5,000 pounds, and steam-driven types are also available.

there's a difference

. . . in speeds to be measured.

And we have instruments to help solve your speed-measuring problems accurately . . . dependably.

Covering a wide range of speeds, each Biddle Instrument is designed to do a specific job . . . and do it well. Included among the Biddle line are:

- "FRAHM" Resonant-reed Permanent Mounting Tachometers
- "FRAHM" Resonant-reed Portable Hand Tachometers
- "JAGABI" Tachoscopes
- "JAGABI" Type-A Tachometers (centrifugal)
- "JAGABI" Speed Indicators (chronometric)

Accuracy . . . dependability . . . ruggedness . . . these are the built-in advantages that you get with every Biddle Instrument . . . advantages equally important in the field, in the laboratory, or on the production line.

The Biddle Instruments listed above and many others are described fully in Bulletin 35-P. We will be pleased to send you a copy.
