Your Memo to J. P. Berndt
August 27, 1968

R. E. Bilger - RBILG

It is our impression, as a result of Bulletin O-18, that information on technical developments going to Mocan must flow through Dominic Dana. Dana is now on vacation, so we could not find out immediately whether this 1964 publication is still effective. When we line this out, E. H. Toombs can be put on our progress reports and final reports pertaining to subjects of his interest.
